Data Migration from Oracle Argus Using DB-to-DB Method

Case Study

Customer Overview

A global mid-sized services company offering comprehensive solutions in Pharmacovigilance, Regulatory Services, Risk Management, Medical Information, and Scientific & Business Services. The company serves over 100 prestigious Pharma and Biotech clients across the globe.

Business Challenge

The client was using **Oracle Argus Safety** for its pharmacovigilance operations. However, with increasing demands for scalability, efficiency, and cloud adoption, the client needed a **robust, modern PV platform** to manage the end-to-end safety case lifecycle, including regulatory submissions to **USFDA, EMA, MHRA, HC**, and Rest of the World (RoW).

Clinevo Solution

The client selected **Clinevo Safety** for its full-spectrum safety case management and submission capabilities. Clinevo carried out a **database-to-database (DB-to-DB) migration** to transfer the client's extensive data securely and efficiently into the **Clinevo Safety Cloud**.

Migration Highlights:

- Migrated a **massive volume of 400,000 historical safety cases** from Oracle Argus.
- Used **direct DB-to-DB transfer** ensuring data integrity, accuracy, and zero data loss.
- Full validation and QA completed by Clinevo to ensure a compliant transition.

Results & Impact

- **Seamless migration** of **400,000 cases** to Clinevo Safety cloud.
- **No disruption** in ongoing operations during migration.
- The platform now supports **50,000+** end-to-end safety cases per year, including:
    - Spontaneous Reports
    - Clinical Trial Cases
    - Medical Device Reports
- Improved efficiency, faster processing, and real-time compliance with global PV regulations.

Conclusion

Clinevo's advanced DB-to-DB migration and powerful Safety platform helped this global services provider enhance its pharmacovigilance capabilities, scale effortlessly, and deliver high-value services to its pharma and biotech clientele.
